

Guide for teachers

****Plugin:**** ZSK course tiles (`local\_zsk\_local\_tiles`)

What you see

When enabled by your institution, courses appear as ****tiles**** instead of a plain list — with course image, title, and short description.

Typical locations:

- ****Dashboard**** (` /my/`)
- ****My courses****
- optionally ****Site home**** and ****course catalogue**** (premium)

Open a course

Click the tile — you enter the course as usual.

Footer information (premium)

The bottom of a tile may show:

- learning progress / completion status
- “not yet enrolled” (catalogue)
- number of courses in a category

What you do not configure

Layout and activation are managed by ****site administrators****. Contact Moodle support for display issues.

Course image and summary are edited in each ****course settings**** page.
