

Settings – reference for administrators

****Plugin:**** `local\_zsk\_ai\_generated` (ZSK AI course labelling)

****Navigation:**** ****Site administration → ZSK AI course labelling****

This guide describes ****all**** configuration pages of the plugin. A short installation overview is in INSTALLATION_ADMIN.md.

Overview of admin pages

Page	Path in administration	Purpose
------	------------------------	---------

-----	-----	-----
-------	-------	-------

Settings	ZSK AI course labelling → **Settings**	Main features, metadata, submissions, status displays
---------------------	---	---

Licence	ZSK AI course labelling → **Licence**	Optional premium licence key
--------------------	--	------------------------------

Compliance dashboard	ZSK AI course labelling → **AI labelling: Compliance dashboard**	Overview of all markings
---------------------------------	---	--------------------------

Audit log	ZSK AI course labelling → **AI labelling: Audit log**	Change history
----------------------	--	----------------

Dashboard and audit log require the capability `local/zsk\_ai\_generated:viewcompliance` (default: Manager).

“Settings” page

AI course labelling

Enable AI labelling

|||

|---|---|

| **Type** | Yes/No |

| **Default** | Yes |

| **Effect** | Turns teacher labelling (course/activity, badges, notice boxes) on or off site-wide.
If **No**, form fields and displays for teachers are disabled. |

Badge label

|||

|---|---|

| **Type** | Information text (no input field) |

| **Customisation** | **Site administration** → **Language** → **Language customisation** →
component `local\_zsk\_ai\_generated`, string ID `badge\_default` |

| **Note** | Badge text follows the user's **display language** (session language via the
language menu, since v2.4.20). This works with all installed language packs without extra admin
fields. |

Badge on partial labelling

|||

|---|---|

| **Type** | Yes/No |

| **Default** | Yes |

| **Effect** | Shows the badge on the **course tile** in listings when only individual activities
(not the whole course) are marked as AI-generated. If **No**, the badge in course lists appears
only when the **entire course** is marked. |

Transparency metadata

Optional extra fields when teachers mark content. All fields are **optional** and can be
enabled or disabled individually.

| Setting | Effect |

|-----|-----|

| ****Show AI level (traffic light)**** | Choice: mostly human / AI-assisted / mostly AI-generated |

| ****Show AI tool**** | Choice: ChatGPT, Claude, Gemini, Copilot, Other |

| ****Show reviewer**** | Assign a Moodle user as reviewer |

| ****Show disclaimer**** | Predefined disclaimer texts for learners |

| ****Learner notice**** | Additional free text on course and activity pages; empty = default from language pack |

| ****Activity metadata on course page**** | Controls expandable metadata under marked activities |

****Activity metadata on course page – options:****

| Value | Meaning |

|-----|-----|

| ****Off (badge only)**** | Badge only, no expandable details in course overview |

| ****Only without content page (recommended)**** | Metadata in course overview when the activity has no own content page |

| ****Always on course page**** | Metadata always under the activity in course overview |

When the ****whole course**** is marked, activity metadata on the course page is omitted (the course notice applies globally).

Compliance & governance

Enable audit log

|||

|---|---|

| ****Type**** | Yes/No |

| ****Default**** | Yes |

| ****Effect**** | Logs markings, metadata changes, and student submissions (AI transparency). Existing entries remain when disabled; no new entries are written. |

AI transparency for submissions

Enable AI transparency for submissions

|||

|---|---|

| ****Type**** | Yes/No |

| ****Default**** | Yes |

| ****Effect**** | Enables the submission declaration for supported activities (Assignment, Forum, Glossary, Wiki, Database, Workshop). The concrete mode is set ****per activity****. If ****No****, all submission forms are disabled site-wide. |

Default for new activities

|||

|---|---|

| ****Type**** | Select |

| ****Options**** | Disabled / Optional / Required |

| ****Default**** | Optional |

| ****Effect**** | Applies to Forum, Glossary, Wiki, etc. until a specific mode is saved in activity settings. ****Without**** a suitable setting, AI fields remain invisible to students. |

| Mode | Meaning |

|-----|-----|

| ****Disabled**** | No AI form |

| ****Optional**** | Students may declare AI use but are not required to |

| ****Required**** | If “AI used: Yes”, tool, scope, and description are mandatory |

Assign bridge status (display only)

Shows whether ``mod/assign/submission/zskassign/`` is installed. On error:
INSTALLATION_SUBMISSIONS.md.

Core integration (display only)

Shows whether patches for Forum, Glossary, Wiki, Database, and Workshop are applied. If
“incomplete”:

```
```bash
php local/zsk_ai_generated/cli/apply_core_patches.php
```

---
```

“Licence” page

The plugin works ****without**** an external service. The free version allows ****25 markings****
(courses + activities combined).

| Setting Description |
|---|
| ----- ----- |
| **Licence server URL** HTTPS endpoint for key verification, e.g.
<code>`https://license.example.com/api/v1/verify.php`</code> |
| **Grace period (days)** Days premium remains active after failed verification (default: 7) |
| **Licence key** Premium key with prefix <code>`ZSK-AI-`</code> |
| **Licence status** Display: Free, Premium, Grace period, or error |

****Recommendation:**** Leave fields empty if you do not use premium. A scheduled task
periodically verifies the key.

Compliance dashboard

****Path:**** `/local/zsk\_ai\_generated/dashboard.php`

- Overview of all marked courses and activities
- Metadata, last change, direct links
- Filters and CSV export

For users who may view compliance – not for students.

Audit log

****Path:**** `/local/zsk\_ai\_generated/auditlog.php`

Logs among other things:

- Marking set / removed (course, activity)
- Metadata saved / removed
- Submission transparency saved
- Deleted targets (activity removed)

Filter by period, user, and action. CSV export available.

Recommended configurations

Minimal rollout (teacher badges only)

- Enable AI labelling: ****Yes****
- AI transparency for submissions: ****No****
- Audit log: as needed

Full transparency (institution)

- Enable AI labelling: ****Yes****
- All metadata fields: ****Yes****
- AI transparency for submissions: ****Yes****
- Default for new activities: ****Optional**** or ****Required**** (institutional policy)
- Audit log: ****Yes****
- Assign bridge + core integration: ****installed****
- Assign `viewcompliance` to compliance team

After Moodle core update

1. Run plugin upgrade
2. Check core integration
3. Purge caches
4. Spot-check Forum + Assignment

Multilingual support

- Plugin language packs: German and English (`lang/de/` , `lang/en/`)
- Badge label and tooltips follow the ****active session language**** (language menu)
- Custom texts via ****Language customisation**** (component `local\_zsk\_ai\_generated`)
- Learner notice field in settings is ****one**** site-wide text (not multilingual via this field); for multiple languages use customisation of `learner\_notice\_default`
